Save a world before it's deleted.

We save the open-metaverse community and secure their IP assets — the first home where digital-art owners hold permanent, self-sovereign title to their work.

27 July 2026 — Spatial deletes unmigrated creator worlds. The window is now.

 **Mission:** rescue the open-metaverse community before the shutdown — and secure every creator's IP, forever.

Migrate

Opt-in rescue of creators' composed 3D worlds onto the web-native Ecoverse runtime — before they vanish.

Protect

Every owner gets a **Web4ID** — cryptographic, portable title to their IP that no platform can ever erase.

Belong

A curated, identity-protected digital-art community with a living home — not a one-time backup.
